# **1 CWMX Rendered in XML**

This chapter contains the CWM Extension (CWMX) metamodels expressed in XML. These metamodels are used to generate the interfaces and XML document types in chapters 2 and 3 of this volume.

The XML is shown below as an update to the CWM XML rather than as a separate XML document so that links to CWM and UML model elements can be expressed as simple XMI references. To add CWMX metamodels to the CWM XML in volume 2, chapter 1, make the two additions shown below.

First, add the following XMI.model elements into the XMI.header section after the CWM XMI.model elements.

```
<XMI.model xmi.name='org.omg.cwmx.foundation.ER' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.foundation.CORBAIDLDataTypes' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.resource.COBOLOData' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.resource.DMSII' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.resource.Essbase' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.resource.Express' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.resource.IMSDatabase' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.analysis.InformationSet' xmi.version='1.0'/>
<XMI.model xmi.name='org.omg.cwmx.analysis.InformationReporting' xmi.version='1.0'/>
```

Second, add the following into the end of the XMI.content section.

```
<Model.Package xmi.id='a1768'>
  <Model.ModelElement.name>ER</Model.ModelElement.name>
  <Model.ModelElement.annotation></Model.ModelElement.annotation>
  <Model.GeneralizableElement.isRoot xmi.value='false' />
  <Model.GeneralizableElement.isLeaf xmi.value='false' />

## ***2 CWM Interfaces as CORBA IDL***

This chapter contains CORBA IDL modules for the CWMX packages. The IDL modules are generated from the CWMX metamodels defined in chapter 1 based on the IDL generation rules of the MOF 1.3 Specification.

The CWMX IDL modules use (by #include) IDL modules for CWM metamodels defined in volume 2 and for UML metamodels defined in the UML 1.3 Specification.

## 2.1 ER.idl

```

### ***3 CWMX Document Types Definitions***

This chapter contains an XML document type definition (DTD) for each CWMX metamodel. The document types are generated using Rule Set 3 of the XMI 1.1 Specification.

Each metamodel has a separate DTD which builds on the DTD of each of its imported metamodels. A comment at the front of each DTD lists the DTD of each imported metamodel.

Section 3.1 contains a DTD for all of CWMX. It includes the CWM DTD (from volume 2, section 3.1) and each CWMX metamodel's DTD (from sections 3.2 through 3.10).

### **3.1 CWMX.dtd**

```
<!ENTITY % CWMDTD SYSTEM "CWM.dtd">
