<center>**OASIS SET TC**</center>

<center>**Use Case Template**</center>

**Submitter: Stephen Green, SystML  and Document Engineering Services Ltd**

**Use Case:  To guide mapping between  a UBL 1.0 and UBL 2.0 Invoice**

**Secondary Use Case: To use SET deliverables to generate CAM templates to support target document**

**Goal: To use SET deliverables to guide mapping between different major versions of a document standard such as UBL and to generate sample transformation stylesheet(s)**

**Secondary Goal: To use SET deliverables to generate CAM templates to support target document**

**Example(s):**

From opensource 'freeb-ubl' project
http://downloads.sourceforge.net/freeb-ubl/freeb-ubl-kit-v1-0.zip
(see also http://xml.coverpages.org/freeb-ubl-Announce.html)

Form this package see:

1. Starting UBL (Subset Conformance Profile) Schema
see 'freeb-ubl-kit-v1-0/Schemata/UBL1-0/SystML1/'

2. Target UBL (Subset Conformance Profile) Schema and example instance
see 'freeb-ubl-kit-v1-0/Schemata/UBL2-0/SystML2/'

3. Example Transformation Stylesheet which might be generated – see below and see
'freeb-ubl-kit-v1-0/VersionToVersion/UBL1SBS1toUBL2/Invoice.xsl'

4. (Secondary Use Case) CAM templates for UBL 2 (SystML2 subset profile) example
'freeb-ubl-kit-v1-0/CAM/SystML-UBL-2-Invoice-subset-example-template/'

Transformation Stylesheet

```xml
<?xml version="1.0" encoding="utf-8"?>
<!--
Created: October 2006 by SystML, http://www.systml.co.uk
-->
<!--
For conversion of UBL 1.0 SBS 1.0 Invoice to UBL 2.0 Invoice.

Limitation: note that codelist values should be checked and
amended for certain codes and coded attributes since there may
be some valid values in UBL 1 which are invalid in UBL 2.0 .
It is suggested that particular attention be given to code values
for '...Quantity/@unitCode'
Care should be taken over indicator values too, noting that 1 and 0
are not allowed in UBL 2.
