Issues:

how precise should gOE(text) be?

<http://lists.oasis-open.org/archives/cgmo-webcgm/200902/msg00071.html>

It looks like option 1 is the preferred option.

WG editorial updates:

center point added to scale()

<http://lists.w3.org/Archives/Public/public-webcgm-wg/2009Mar/0001.html>

clipping clarification for gOE

<http://lists.w3.org/Archives/Public/public-webcgm-wg/2009Mar/0000.html>

also a clarification of gOE for rasters

Face to Face meeting

Late April looks like it will be too late to discuss issues discovered while developing the test suite but too early to expect two implementations of all the features. In two weeks we will try to make a final call about if the meeting should be held or not the last week of April.

Other

The DTD for the ACI needs to be updated. Lofton will update this and send out a message to the list when this is done.

Next telecon or work session

Next call on the March 18th 2009
