

OASIS ebXML Registry TC Meeting Notes, May 25, 2006

Attendees:

Kathryn Breininger	The Boeing Company
Ted Haas	GS1 US
Carl Mattocks	MetLife
Monica Martin	Sun Microsystems

Quorum was not reached, so this was an informal discussion meeting.

Kathryn, Monica and Carl talked briefly about their impressions of the OASIS Symposium. The theme was interoperability, with many presentations and panel discussions centered around that topic. Some of these could have been stronger presentations. It appears that there is a movement towards more liaison and interoperation between the various standards bodies. A number of contacts were made with other organizations interested in ebXML Registry, such as ACORD.

Ted discussed work going on with UNSPSC and future direction.

We discussed the ebXML Registry Profile for Web Ontology document. Kathryn agreed to send out another reminder for TC members to review and send comments by June 15th.

Topics for the agenda for next meeting:

Discuss ebXML Registry Profile for Web Ontology document
Continue to work on review and editing of Profile Template Document.
