

**OASIS UnitsML TC Teleconference  
September 14, 2011, 10:03 – 10:45 AM EDT**

**Teleconference Attendees:**

Bob Dragoset, NIST  
Mark Carlisle, NIST  
Karen Olsen, NIST  
Martin Weber, NIST  
Peter Linstrom, NIST  
Karen Legrand, IEM

**Meeting minutes**

Mark took written highlights.

**Previous Draft Minutes**

- Minutes from the August meeting were approved, contingent on the absence of asynchronous input.

**Audio Recording**

Audio is available [here](#).

([http://www.oasis-open.org/committees/download.php/43693/20110914\\_8kbps.wma](http://www.oasis-open.org/committees/download.php/43693/20110914_8kbps.wma))

**Discussion**

- The schema was modified to add “av\_” to the enumerated root units of (Avoirdupois) pound, ounce, and dram, and to add light\_second, light\_minute, light\_hour, and light\_week.
- Bob briefed the TC on his presentation to ATML developers on September 11: There was some interest in UnitsML, but it’s not a “drop-in” fit to ATML as ATML is currently set up.

**Votes**

The schema incorporating the above changes was approved by all present as CSD4.

**Future Meeting**

The next meeting is scheduled for Wednesday, October 12, 2011 at 10:00am EDT.
