March 27, 2015

OASIS respectfully advises ITU-T Study Group 17, and its Question 10 working party, that OASIS' E-Identity Credential Trust Elevation Methods Technical Committee (the "Trust Elevation TC"):

https://www.oasis-open.org/committees/trust-el

is working on developing a set of specifications in part based on ITU-T X.1254, for enhancing the trust in identity authentication steps. Please see:

Trust Elevation Framework v1.0 cs01 (2014)
http://docs.oasis-open.org/trust-el/trust-el-framework/v1.0/cs01/trust-el-framework-v1.0-cs01.html

AnalysisMethods v1.0 wd01 v0.6 (2013)

Trust Elevation Survey v1.0 wd01 (2012)

The OASIS committee intends to submit its final work to ITU-T SG 17, upon its completion and OASIS approval, in a manner that similar to other OASIS standards that have been submitted, reviewed and adopted by ITU-T. The OASIS committee hopes to be able to submit its completed work to SG 17 in the planned September meeting of your study group.

Thank you for your consideration. OASIS looks forward to continued cooperation with ITU-T, SG 17 and Q10/17; and our consortium and appreciates its long-time constructive collaboration with ITU-T, on this and a number of other open standards, promoting interoperability and the global information society. Information about OASIS generally can be found at:

http://www.oasis-open.org

Respectfully submitted,
James Bryce Clark for OASIS
