PKCS #11 v3.0 Statement of Use

General Statement

Utimaco has successfully implemented selected mechanisms of the OASIS PKCS #11 Cryptographic Token Interface Base Specification [2], [3], [4] in accordance with the OASIS policy. The implementation has successfully been used in interoperation with other implementations.

Detailed Statement

Utimaco has successfully implemented the core set of data types, objects, and functions defined in the OASIS PKCS #11 Cryptographic Token Interface Base Specification [2] in our SecurityServer PKCS #11 provider and administration tools. The PKCS #11 provider in the current SecurityServer 4.3x releases supports numerous mechanisms defined in the PKCS #11 Cryptographic Token Interface Current Mechanisms Specification Version 2.40 Errata 01 [5] and selected mechanisms newly introduced with the PKCS #11 Cryptographic Token Interface Current Mechanisms Specification Version 3.0, Committee Specification 01 [3]. Further objects, functions and mechanisms newly introduced in [2] and [3] will become available with our PKCS #11 provider in the next SecurityServer 4.4x releases.

PKCS #11 consumer implementations by Cryptsoft and Primekey have successfully been used in interoperation with Utimaco's SecurityServer PKCS #11 provider implementation.
