

40. UPDATE PERSONTIME - REVISION 002

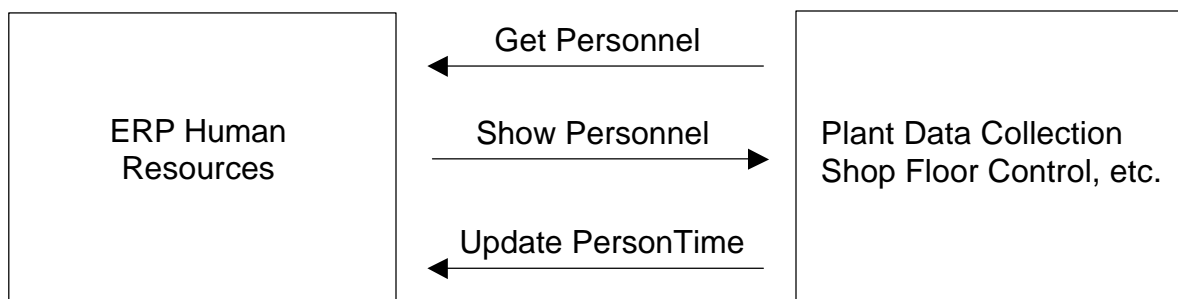

40.0 Overview

This chapter describes the Business Service Request named UPDATE PERSONTIME, the Verb being UPDATE and the Noun being PERSONTIME.

The purpose of the UPDATE PERSONTIME Business Service Request is to update work time information for an employee from a data collection application to an ERP Human Resource application.

This BSR will cause updates to occur.

This BSR may be used individually, or as part of a larger interface scenario. The picture below visualizes a possible use of this BSR.

40.1 UPDATE PERSONTIME

The UPDATE PERSONTIME Business Object Document uses the following Data Type:

1. **PERSONNEL** - Contains personnel Information about a worker. This Data Type is required.

40.2 PERSONNEL

The Data Type, "**PERSONNEL**", is the only Data Type the Business Service Request "**UPDATE PERSONTIME**" uses.

Listed are all the Field Identifiers and Segments that are valid for use within the PERSONNEL Data Type. The first column of the table indicates the name. Segment names also include the Qualifier in parenthesis.

The second column indicates in which OAGIS Appendix the data is described, basically if the data is a Field Identifier or a Segment. Details of the Field Identifiers can be located in Appendix C, and details of the Segments can be located in Appendix D.

The first table represents required data.
