

67. CANCEL PRODUCTREQ - REVISION 002

67.0 Overview

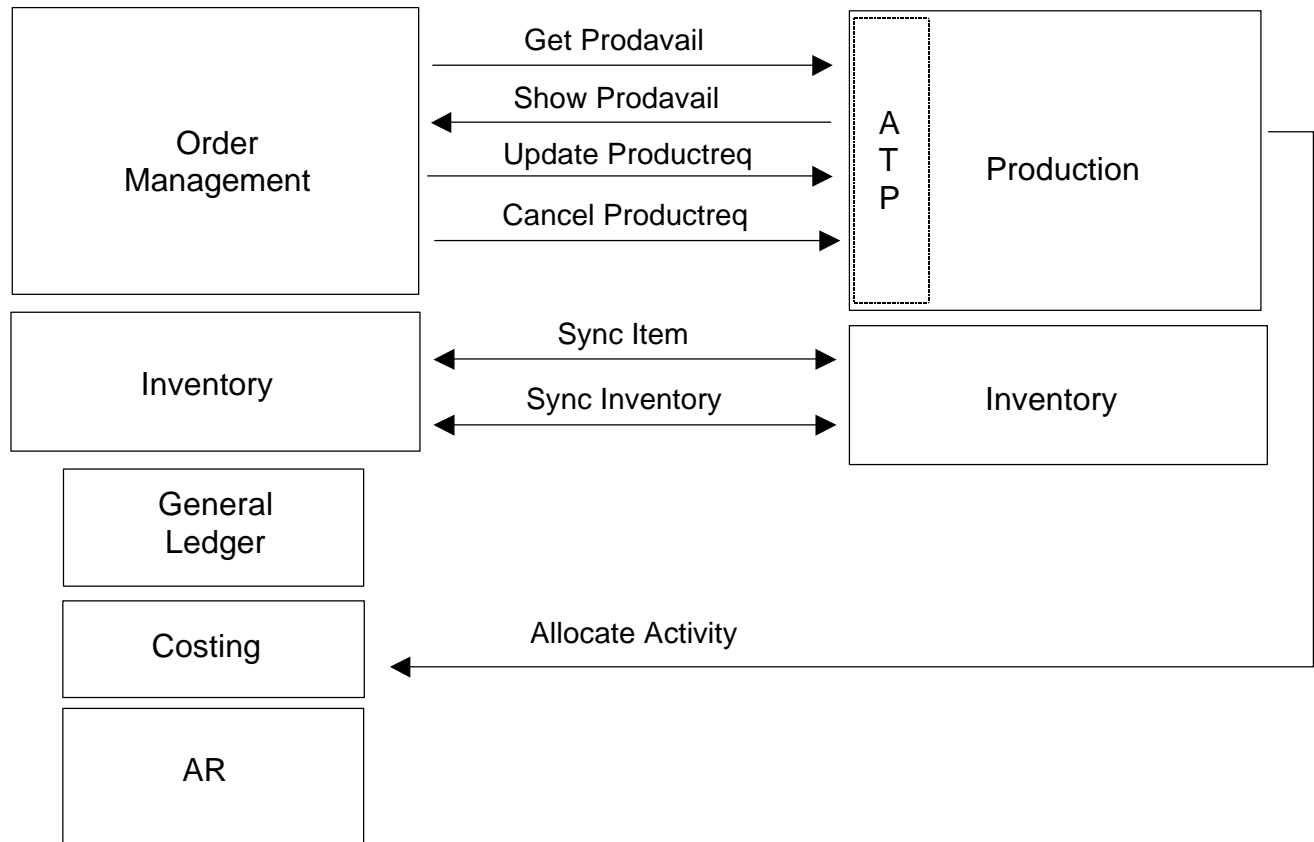

This chapter describes the Business Service Request named CANCEL PRODUCTREQ, the Verb being CANCEL and the Noun being PRODUCTREQ.

The purpose of the CANCEL PRODUCTREQ Business Service Request is to communicate from one business application to one or more other business applications that a previously requested item is no longer required.

Processing Notes: This cancel must refer to the original item requested. To cancel the item(s), each item to be cancelled must be included.

This BSR commonly causes updates to occur.

This BSR may be used individually, or as part of a larger interface scenario. The picture below visualizes one possible business application integration scenario in which this BSR could be used.

67.1 CANCEL PRODUCTREQ

The CANCEL PRODUCTREQ Business Object Document consists of the following Data Type:

1. **PRODUCTAVL** - Information required to identify the previously ordered item and to reset the order information. This Data Type is required.

67.2 PRODUCTAVL

The Data Type, “**PRODUCTAVL**”, is the only Data Type the Business Service Request “**CANCEL PRODUCTREQ**” uses.

Processing Notes:

To cancel item(s), each item to be cancelled must be included.

Listed are all the Field Identifiers and Segments that are valid for use within the **PRODUCTAVL** Data Type. The first column of the table indicates the name. Segment names also include the Qualifier in parenthesis.

The second column indicates in which OAGIS Appendix the data is described, basically if the data is a Field Identifier or a Segment. Details of the Field Identifiers can be located in Appendix C, and details of the Segments can be located in Appendix D.

The first table represents required data.

REQUIRED PRODUCTAVL DATA	
NAME	APPENDIX
DATETIME(AVAILABLE)	D
ITEM	C
SITELEVEL1	C

The second table describes data that is optional.

OPTIONAL PRODUCTAVL DATA	
NAME	APPENDIX
