

82. LIST COUNTINFO - REVISION 002

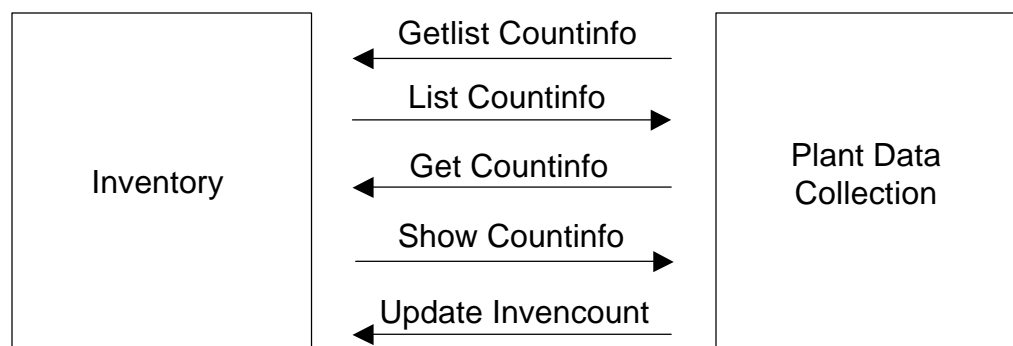

82.0 Overview

This chapter describes the Business Service Request named LIST COUNTINFO. The Verb is LIST and the Noun is COUNTINFO. The LIST verb describes the behavior of supplying one or several documents in a summary format to the requesting business application.

The purpose of the LIST COUNTINFO Business Service Request is to enable an Inventory application system to send multiple occurrences of summary or detail inventory count information to a Plant Data Collection or other application system.

This BSR may be in response to a GETLIST COUNTINFO request, or it may be a notification vehicle, initiated upon an event in a business application.

This BSR may be used individually, or as part of a larger interface scenario. The picture below visualizes a possible use of this BSR.

82.1 List Countinfo

The LIST COUNTINFO Business Service Request uses one Data Type. This Data Type represents the Inventory Count Document that an ERP system generates and the PDC system is requesting.

1. **INVDOCUMNT** - This Data Type contains the information in an Inventory Count Document. This Data Type is required.

82.2 INVDOCUMNT

The Data Type, “**INVDOCUMNT**”, is the only Data Type the Business Service Request “**LIST COUNTINFO**” uses.

Listed are all the Field Identifiers and Segments that are valid for use within the INVDOCUMNT Data Type. The first table represents required data.

REQUIRED INVDOCUMNT DATA	
NAME	APPENDIX
DATETIME(EFFECTIVE)	D
DOCUMENTID	C
ITEM	C

Processing Note: One of the three fields above is required, but not all three are required.

The second table describes data that is optional.

OPTIONAL INVDOCUMNT DATA	
NAME	APPENDIX
DESCRIPTN	C
DISPOSITN	C
DOCTYPE	C
ELEMENT1 - ELEMENT999	C
GLENTITYS	C
INDLINENUM	C
ITEMRV	C
LOTLEVEL1 - LOTLEVEL2	C

OPTIONAL INVDOCUMNT DATA	
NAME	APPENDIX
NOTES	C
PROPERTY1 - PROPERTY99	C
QUANTITY(ITEM)	D
REASONCODE	C
SERIALNUM	C
SITELEVEL1 - SITELEVEL9	C
USERAREA	C
