# Today's Agenda

- ▼ e-Government: The context
- ▼ A look back: e-Government initiatives in Hong Kong
  - ▼ Background and Business drivers
- ▼ A look around: From EDI to XML - Implementations
  - ▼ Objectives and Requirements
  - ▼ Architecture
- ▼ A look forward: Summary and conclusion

# Using ebXML to Implement a North Asian Government Trading Community

e-Government: The context

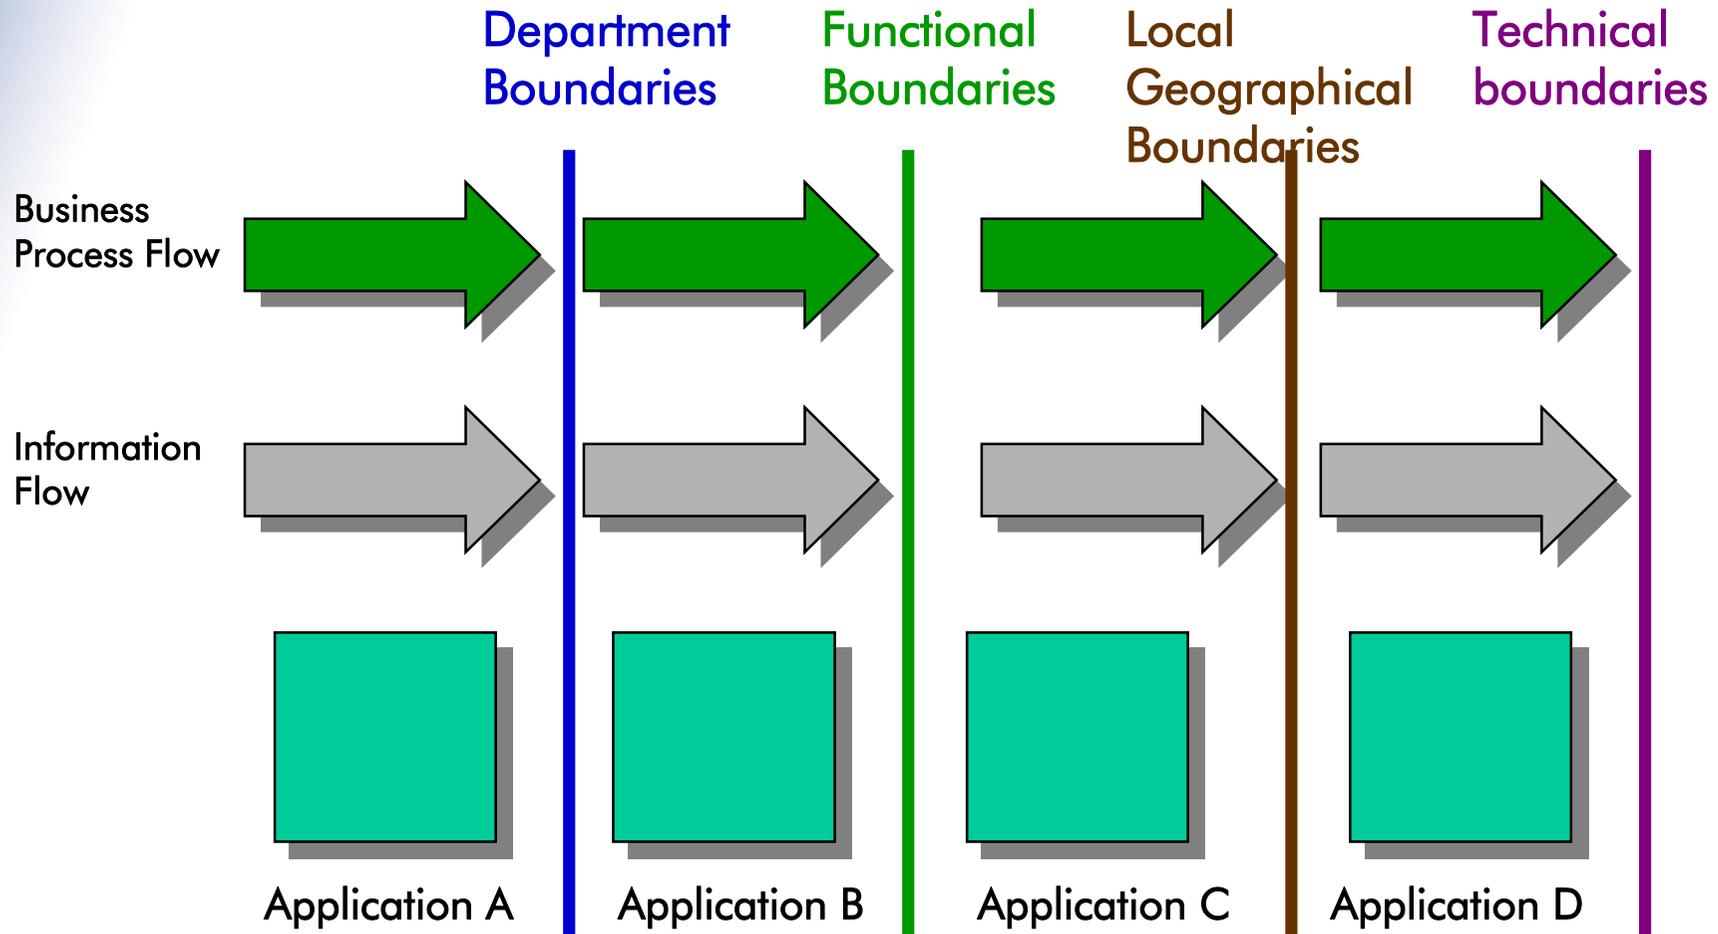

**Axway.**  
a Sopra Group company

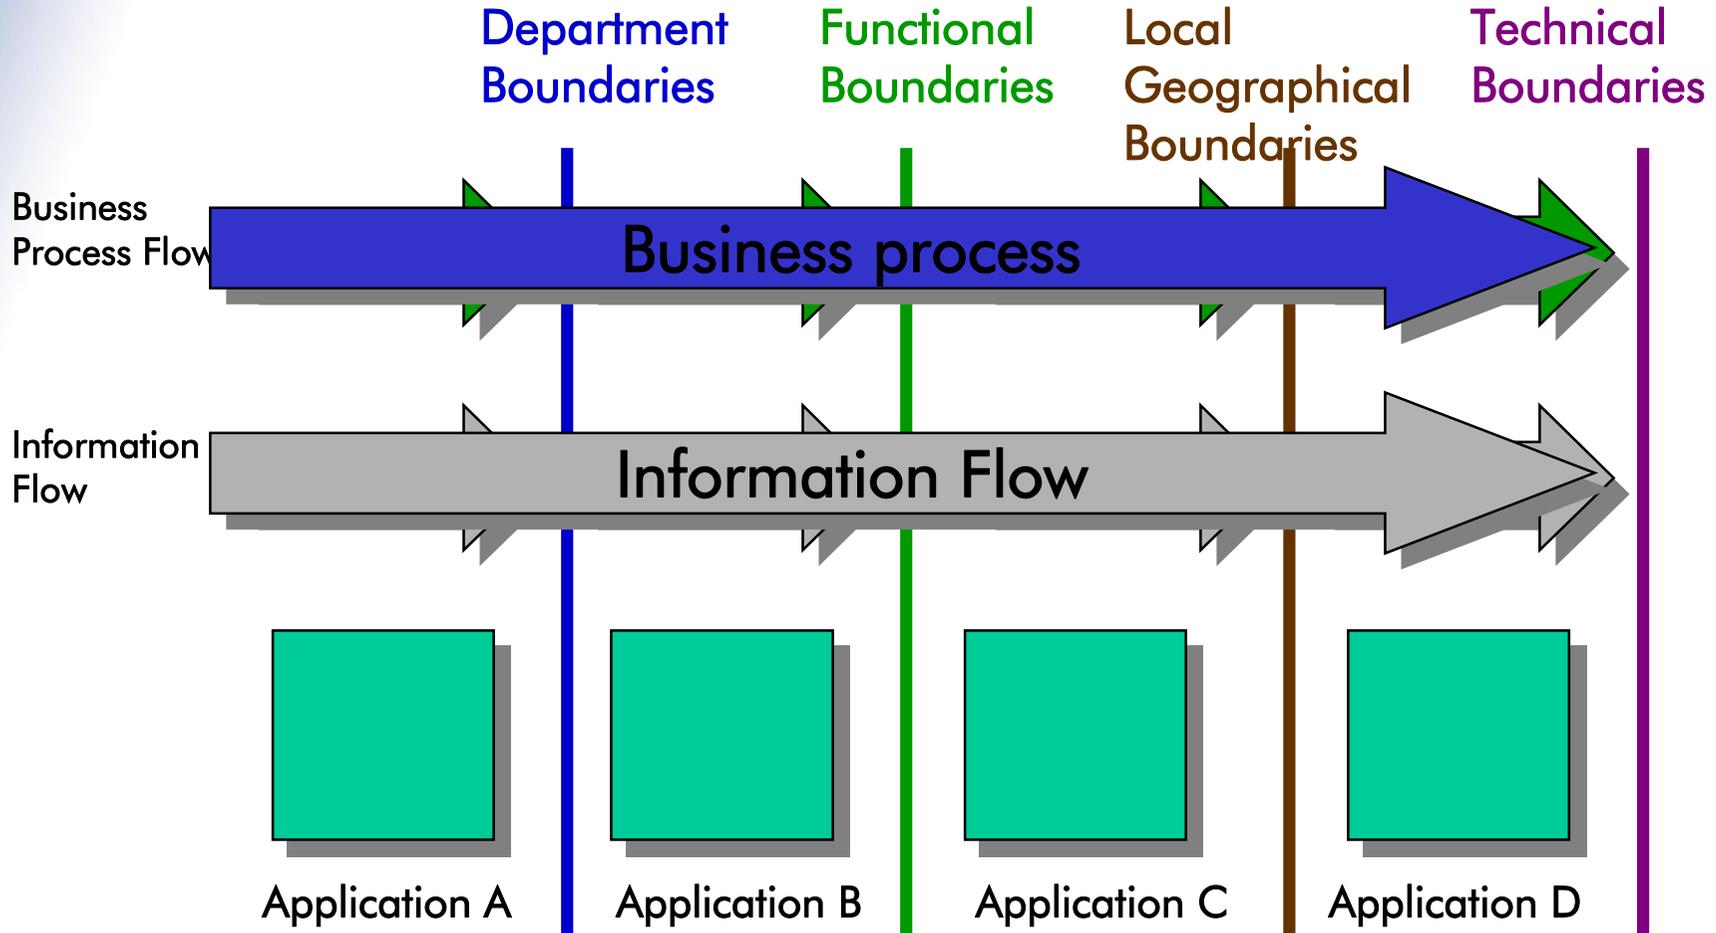

## Assumptions behind e-Business and standards

- ▼ No task can be performed better than the information it is based on ...
- ▼ Organisations, enterprises and governments only work as fast as the information flow ...
- ▼ Use of open e-Business Standards is one of the founding pillars within your information integration infrastructure ...

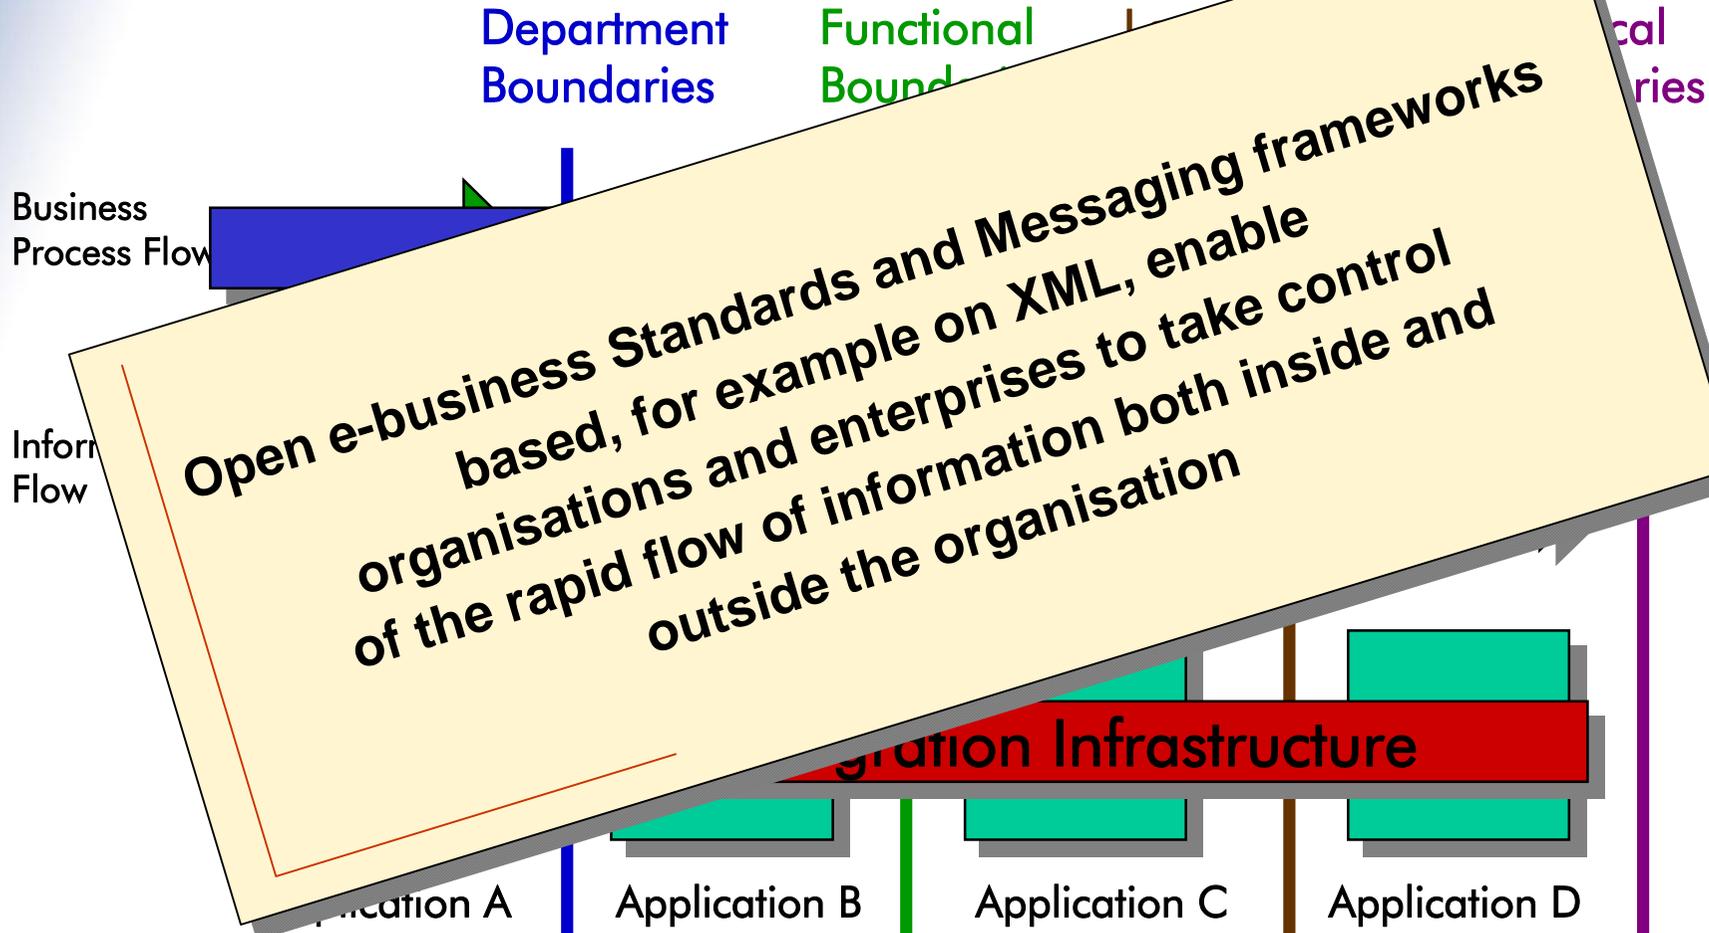

# The usual situation within enterprises

# The Agile Enterprise

# The Fast and Extended Enterprise

# Using ebXML to Implement a North Asian Government Trading Community

A look back: e-Government  
initiatives in Hong Kong

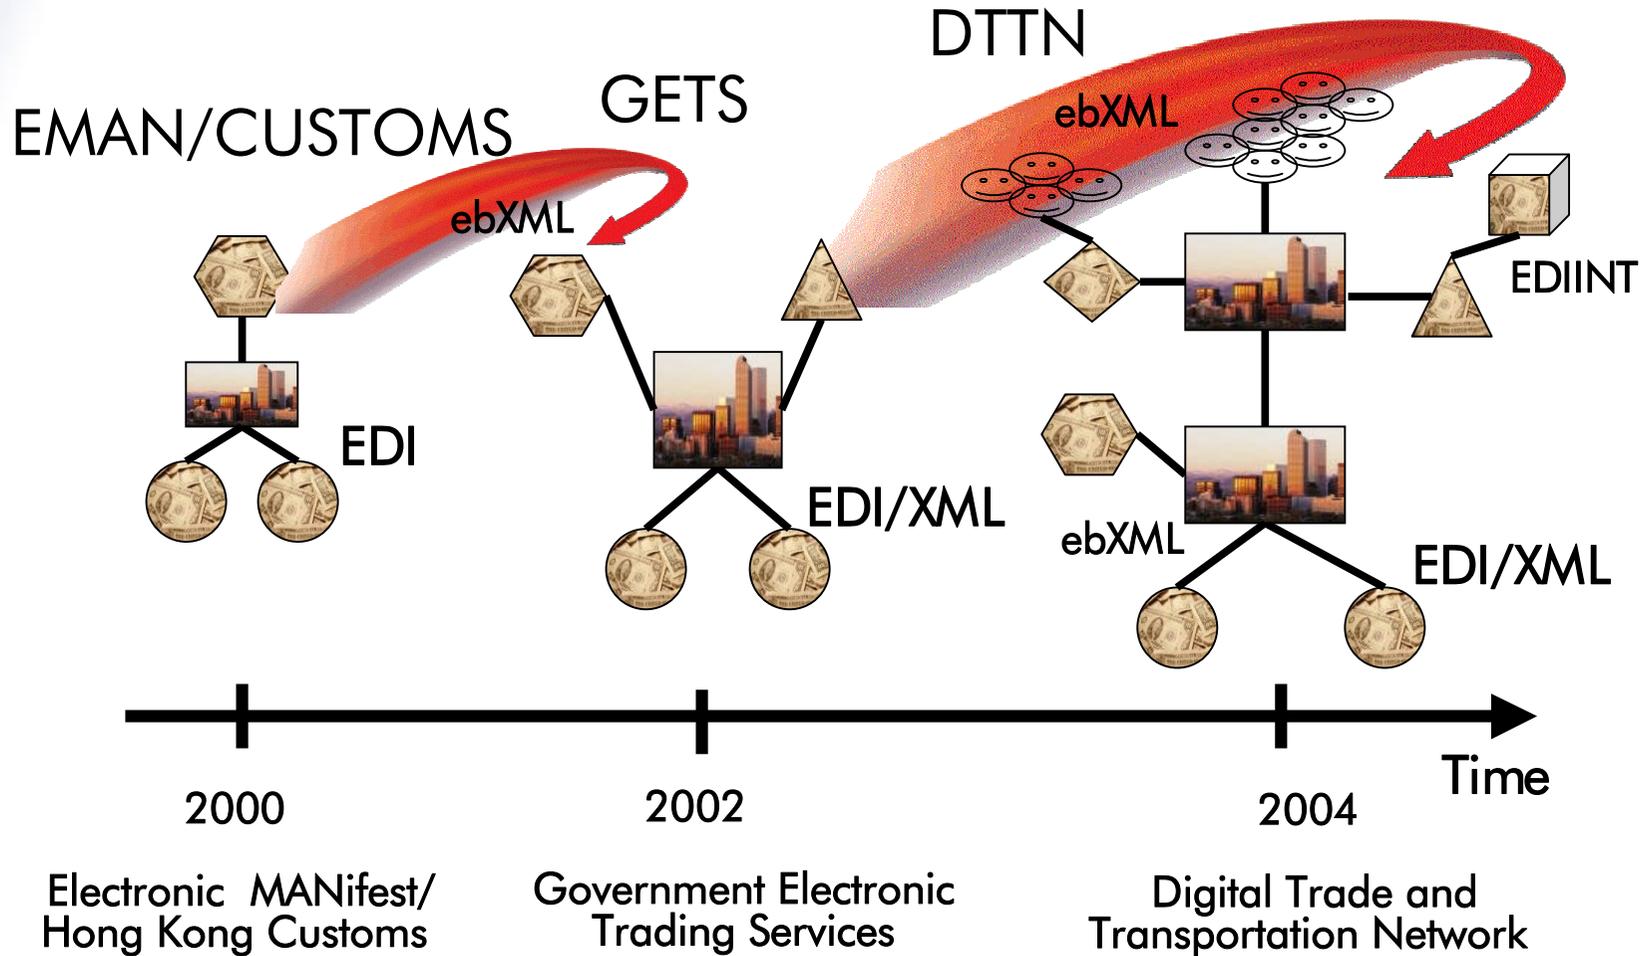

**Axway.**  
a Sopra Group company

# Business drivers

- ▼ **Competitive environment**
- ▼ **Government to business (G2B)**
  - ▼ The need for business collaboration within and between governments and enterprises, different industries such as trade facilitation, transport, logistics, etc.
- ▼ **Technology initiatives**
  - ▼ XML (ebXML)
  - ▼ Web Services
  - ▼ ...
- ▼ **Open e-business organisations within the region**
  - ▼ Center for E-Commerce Infrastructure Development (CECID), [www.cecid.hku.hk](http://www.cecid.hku.hk)
  - ▼ Pan-Asian e-Commerce Alliance (PAA), [www.paa.net](http://www.paa.net)
  - ▼ ebXML Asia Committee (eAC), [www.ebxmlasia.org](http://www.ebxmlasia.org)
  - ▼ ...

# Hong Kong Government e-Business initiatives - Three main phases

# Using ebXML to Implement a North Asian Government Trading Community

A look around: From EDI to XML -  
Implementations

**Axway.**  
a Sopra Group company

# Using ebXML to Implement a North Asian Government Trading Community

Phase 1: Electronic MANifest  
(EMAN) / Hong Kong Customs

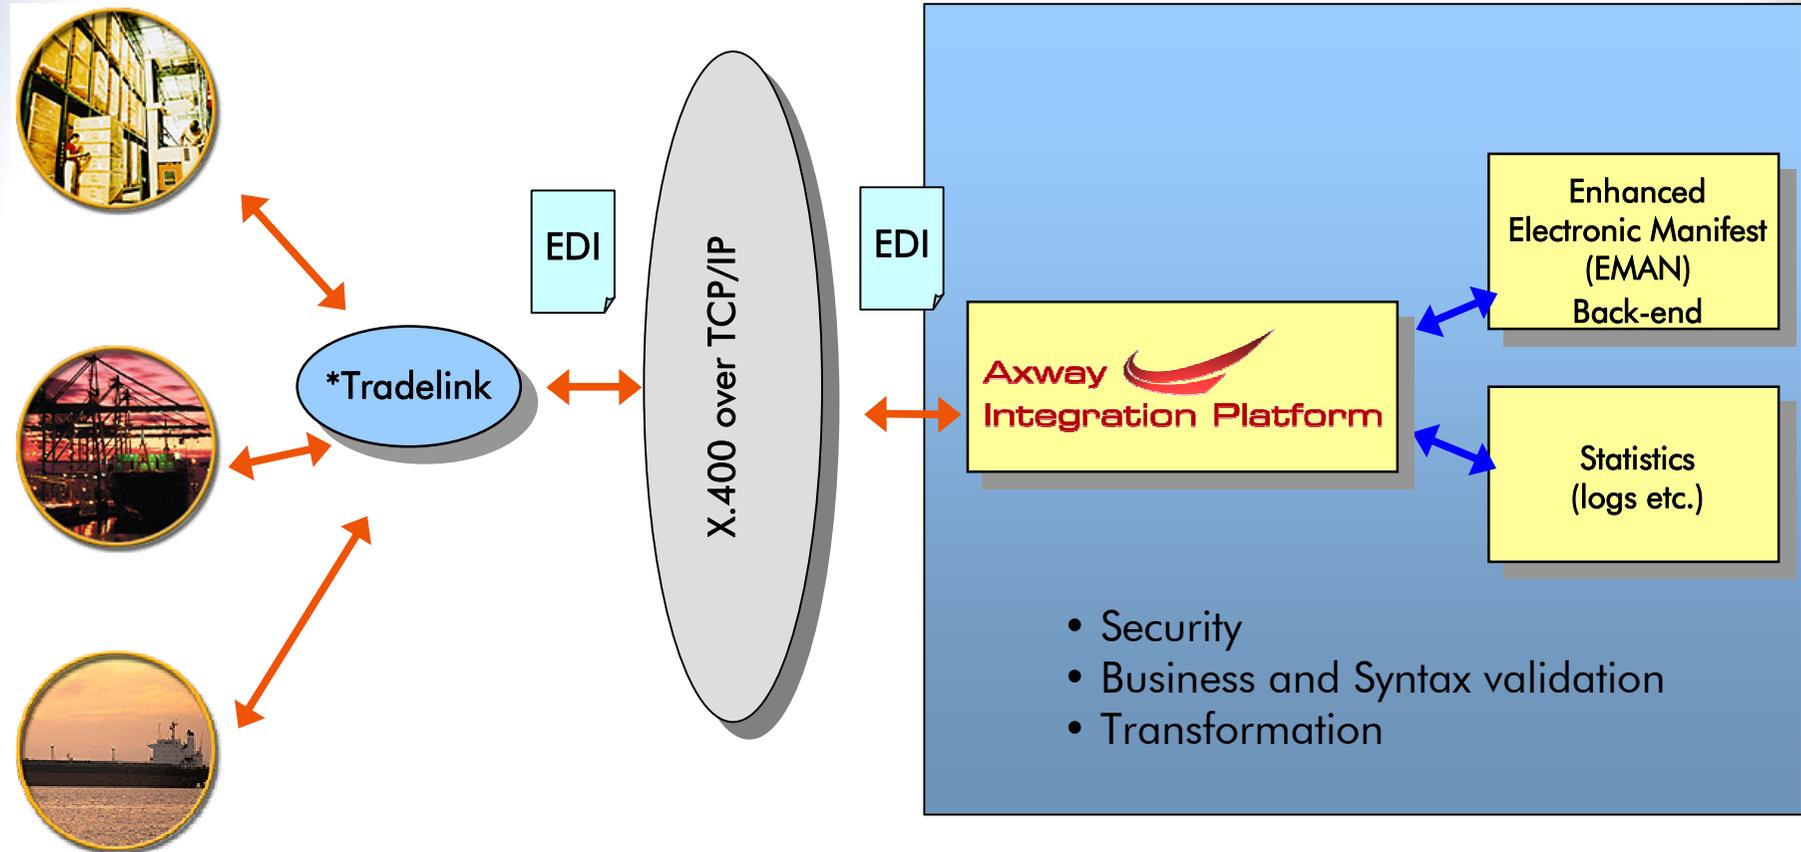

**Axway.**  
a Sopra Group company

# EMAN/Hong Kong Customs - Objective and requirements

- ▼ **Move towards one e-Infrastructure platform**
  - ▼ Efficient, reliable and scalable
    - Ability to automate the process
    - Quick turnaround time
    - Ability to scale to increasing workload and new technological requirements
  
- ▼ **Seamless Integration between VANs / Service Provider and Customs EMAN (Electronic Data Interchange for Cargo Manifest) System**
  
- ▼ **Migration of EDI to XML (start of...)**
  - ▼ Support business formats, such as
    - EDI
      - *EDIFACT (v3 and v4 of the EDIFACT syntax)*
      - *ANSI X.12*
    - XML

# EMAN/Hong Kong Customs - Architecture

Logistics, Ports, Shipping,  
Importers/Exporters, etc.

\*Until the end of 2003, Tradelink was the only trade service provider for HK Govt

# Using ebXML to Implement a North Asian Government Trading Community

Phase 2. Government Electronic  
Trading Services (GETS)

**Axway.**  
a Sopra Group company

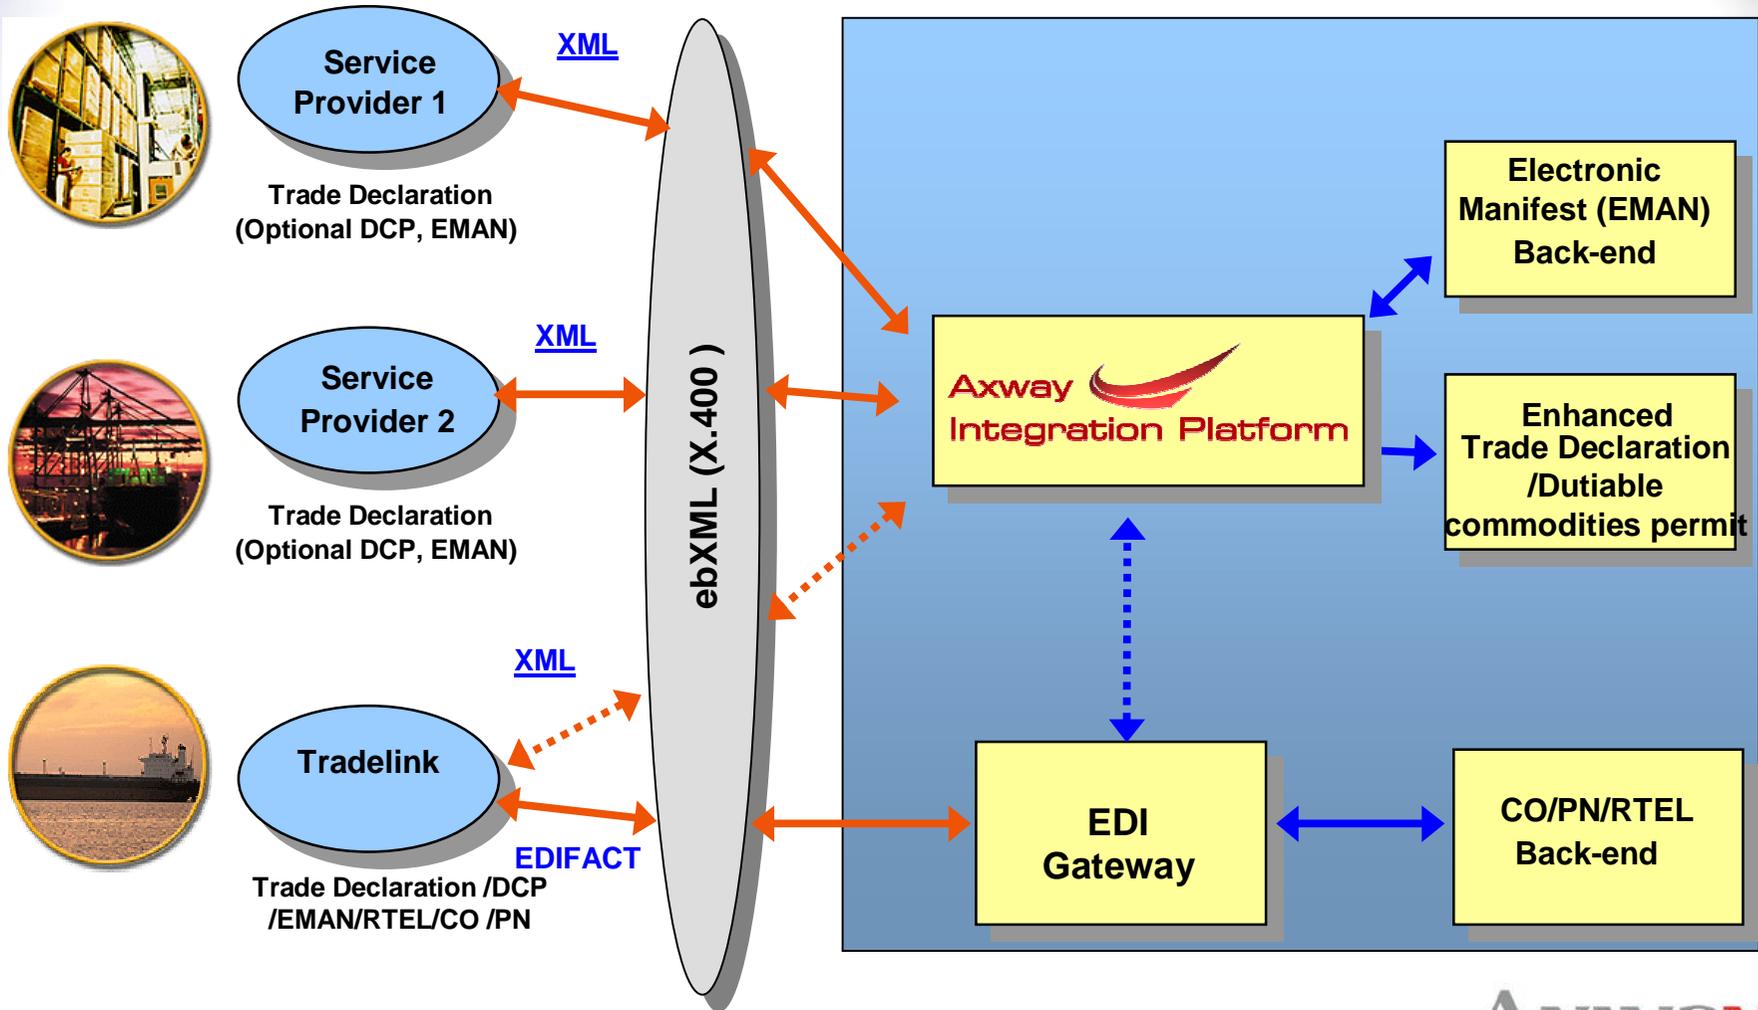

# GETS – Objective and Requirements

- ▼ **Increase quality (through competition)**
  - ▼ GETS will help establish new front-end services for processing certain Government official trade-related documents
- ▼ **Introduction of open e-Business Standards like ebXML**
- ▼ **Replace EDI with XML**
  - ▼ Import and export declarations
    - For the trade-related information, the ISO 10646 standard will be adopted for processing traditional and simplified Chinese characters, including Hong Kong Supplementary Character Set
  - ▼ Dutiable commodities permit
  - ▼ Cargo manifest (excluding the road mode of transport)
- ▼ **High available and scalable platform including**
  - ▼ Authentication
  - ▼ Validation
  - ▼ Transformation
  - ▼ Logging

# GETS - Architecture

Customs, Logistics, Ports, Shipping,  
Importers/Exporters, etc.

# Using ebXML to Implement a North Asian Government Trading Community

Phase 3. Digital Trade and  
Transportation Network (DTTN)

**Axway.**  
a Sopra Group company

## DTTN - Objective and need...

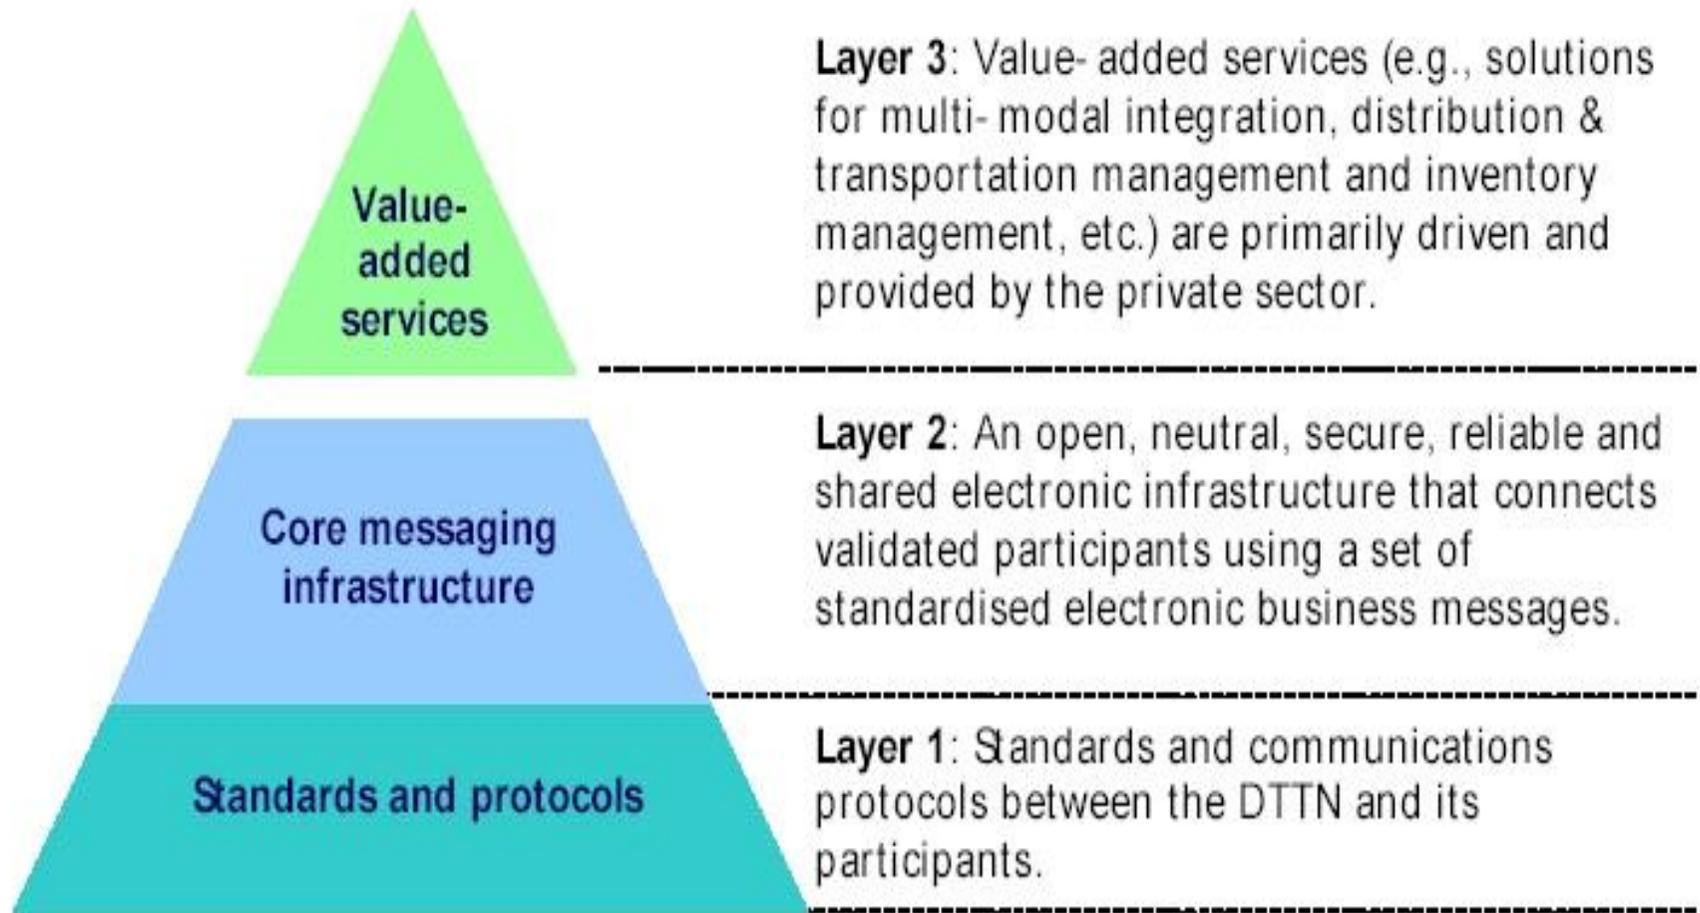

*"With Hong Kong's excellent transportation facilities and the Pearl River Delta (PRD)'s high productivity, together we can develop into a logistics hub to link the Mainland with the world.*

*We can promote the development of an inter-modal system and consider other supporting facilities to speed up the flow of goods and information. The provision of integrated services will also strengthen Hong Kong's competitive advantages as a supply-chain base. "*

*- 2001 Hong Kong Government Policy Address*

# DTTN - Architecture

## DTTN - Business Benefits

- ▼ Improve operational efficiency
- ▼ Enable new business opportunities
- ▼ Compete on value, not just cost
- ▼ Integrate with global initiatives
- ▼ Integrate with Mainland China
- ▼ Induce changes to improve IT literacy of the industry
- ▼ Respond to competitive challenge
- ▼ Improve Hong Kong's image
- ▼ Shield the industry from frequent upgrades

# Using ebXML to Implement a North Asian Government Trading Community

A look forward: Summary and  
conclusion

# Challenge

## Can adoptions of open e-business standards alone solve the problems?

- ▼ Not alone ... but they help create the platform for maximum participation ...
  - ▼ e-business standards should be used together and with a robust and scalable B2Bi solution.
  - ▼ Business Activity Monitoring is the cornerstone in monitoring & managing “Events” across applications and enterprises for e-Government initiatives.
  - ▼ End-Users must be encouraged to participate in the collaboration; it is important that all parties - irrespective of size - engage in electronic business.

Initiatives such as those undertaken by OASIS, go a long way to making sure that standards are accessible to Governments and End-Users

Some final words of advice ...

**BE FOCUSED**

**BE FASTER**

**BE FLEXIBLE**

**BUT... BE FRUGAL**
