

Members of the OASIS international consortium are providing demonstrations of KMIP v2.0 and KMIP v2.1, one of the industry's most widely-adopted Key Management security standards.

Booth visitors will be invited to view standalone demonstrations from Cryptsoft, Fortanix, IBM, PrimeKey, QuintessenceLabs and Utimaco—companies that are part of the OASIS KMIP Technical Committee.

Demonstrations provide RSA visitors with an unique opportunity to view the full key management lifecycle including creating, registering, locating, retrieving, deleting, and transferring symmetric and asymmetric keys and certificates among vendor systems.

www.oasis-open.org/committees/kmip

The Key Management Interoperability Protocol (KMIP) Technical Committee works to define a single, comprehensive protocol for communication between encryption systems and a broad range of new and legacy enterprise applications, including email, databases, and storage devices.

Participation is open to all.

INTEROP PARTICIPANTS

CRYPTSOFT

Established in 1996, Cryptsoft is an Australian security firm providing specialist products and services for software and hardware developers in the areas of security system design, deployment, validation and interoperability. Cryptsoft offers a range of software development toolkits to enable the rapid integration of enterprise key management and encryption solutions into applications and systems ranging from embedded platforms through to enterprise class appliances and servers.

Quintessence Labs

QuintessenceLabs is pushing back the boundaries of what is possible in data security, to let you push boundaries of your own. Our quantum cyber-security solutions deliver a strong foundation for data protection, harnessing the power of nature. They include a powerful and interoperable key and policy manager, a high-speed true random number generator, with the added safety of a FIPS compliant key store.
