KING & UNION
GENERAL INFORMATION

Building Access
Attendees have access to the building on both Wednesday, 3 October (8:00-7:00 PM) and Thursday, 4 October (8:30-5:30 PM). Conference badges should be worn at all times while in the building.

Cybersecurity Product Exhibits & Demos
Demonstrations featuring the latest cybersecurity products will be featured in the South Foyer throughout the conference. Attendees are encouraged to stop by each exhibit during lunch and breaks.

Internet Connectivity
Wireless internet connectivity is available. Details are posted in the registration area.

Lunch & Refreshment Breaks
Refreshments will be served each day in the North Foyer. Lunch will be located on the main level in the “L” Rooms.

Networking Reception
Join us for some delicious edibles and libations. Take this opportunity to unwind & connect with the sponsors, speakers, and other conference guests. You’ll also have a chance to win an Amazon gift card during the sponsor raffle portion. Don’t miss out!

Open Dialogue Format
Attendees are encouraged to participate in the Q&A segment of each presentation. Microphones are available in the room for questions and comments from the floor. In addition, dialogue will take place using the conference twitter hashtag:

#BorderlessCyber

Session Slides & Recording
Speaker slide presentations and session recordings will be available after the conference. Details will be forwarded to all those in attendance here at the conference.

Anomali
Anomali detects adversaries and tells you who they are. Organizations rely on the Anomali Threat Platform to detect threats, understand the adversary, and respond effectively. Anomali arms security teams with machine learning optimized threat intelligence and identifies hidden threats targeting their environments. Anomali enables organizations to collaborate and share threat information among trusted communities and is the most widely adopted platform for ISACs worldwide. Visit website: www.anomali.com

EclecticIQ
EclecticIQ enables intelligence-powered cybersecurity for government organizations and commercial enterprises. We develop analyst-centric products and services that align our clients’ cybersecurity focus with their threat reality. The result is intelligence-led security, improved detection and prevention, and cost-efficient security investments. Our solutions are built specifically for analysts across all intelligence-led security practices such as threat investigation, and threat hunting, as well as incident response efforts. And we tightly integrated our solutions with our customers’ IT security controls and systems. EclecticIQ operates globally with offices in Europe, United Kingdom, and North America, and via certified value-add partners. Visit website: www.eclecticiq.com

IBM Security
Cyber criminals are growing in number and sophistication, rendering traditional perimeter solutions powerless against today’s advanced threats. IBM Security, with 7,500 dedicated professionals in more than 130 countries, delivers next-generation intelligent, integrated security technology and services to outthink cybercriminals, detect threats and respond quickly to breaches. We focus on the most critical needs of more than 12,000 clients: transforming security programs; optimizing security operations and incident response systems, and protecting their most critical and valuable information. Visit website: www.ibm.com

ThreatQuotient
ThreatQuotient delivers an open and extensible threat intelligence platform (TIP) to provide defenders the context, customization and collaboration needed for increased security effectiveness and efficient threat operations and management. ThreatQ accelerates the transformation of threat data into actionable threat intelligence by giving defenders unmatched control through a threat library, an adaptive workbench and an open exchange to ensure that intelligence is accurate, relevant and timely to their business. Visit website: www.threatq.com
