The OASIS Technical Advisory Board presents a program that brings together leading experts sharing their understanding and experience to help the XML and OASIS community build stronger, more useful vocabularies. Sessions consider a full range of topics including UBL, Versioning and Development, Semantics and Ontologies, and Experiences/Case Studies/Verticals. Of particular interest this year, are presentations focusing on lessons developers and designers have learned (and are continuing to learn) about the evolution of vocabularies. Prior to the Symposium sessions will be a variety of half-day tutorials complimentary to all Symposium registrants (members and non-members alike).

Presenter lineup includes:

~ William Barnhill, Booz Allen Hamilton
~ Kathryn Breininger, The Boeing Company
~ Anthony Coates, London Market Systems
