
15-day Public Review for #OData, OData Atom Format and OData JSON Format, V4.0

Submitted by cesign on Wed, 2013-07-03 20:54

Type:

Public Review

The OASIS Open Data Protocol (OData) TC [1] members have recently approved three Committee Specification Drafts (CSDs) and submitted them for 15-day public review:

OData Version 4.0

Committee Specification Draft 02 / Public Review Draft 02

24 June 2013

OData Atom Format Version 4.0

Committee Specification Draft 02 / Public Review Draft 02

24 June 2013

OData JSON Format Version 4.0

Committee Specification Draft 02 / Public Review Draft 02

24 June 2013

Specification Overview:

The Open Data Protocol (OData) enables the creation of REST-based data services, which allow resources, identified using Uniform Resource Identifiers (URIs) and defined in an Entity Data Model (EDM), to be published and edited by Web clients using simple HTTP messages. OData version 4.0 defines the core semantics and facilities of the protocol, a set of recommended (but not required) rules for constructing URLs to identify the data and metadata exposed by an OData service as well as a set of reserved URL query string operators, an Entity Data Model (EDM), and an XML representation of the entity data model exposed by an OData service.

OData Atom Format version 4.0 extends the former by defining representations for OData requests and responses using an Atom format.

OData JSON Format version 4.0 extends the former by defining representations for OData requests and responses using a JSON format.

TC Description:

The OASIS OData TC works to simplify the querying and sharing of data across disparate applications and

multiple stakeholders for re-use in the enterprise, Cloud, and mobile devices. A REST-based protocol, OData builds on HTTP, AtomPub, and JSON using URIs to address and access data feed resources. It enables information to be accessed from a variety of sources including (but not limited to) relational databases, file systems, content management systems, and traditional Web sites. OData provides a way to break down data silos and increase the shared value of data by creating an ecosystem in which data consumers can interoperate with data producers in a way that is far more powerful than currently possible, enabling more applications to make sense of a broader set of data. Every producer and consumer of data that participates in this ecosystem increases its overall value.

Public Review Period:

The public review starts 05 July 2013 at 00:00 GMT and ends 20 July 2013 at 23:59 GMT. The specification was previously submitted for public review [2]. This 15-day review is limited in scope to changes made from the previous review. Changes are highlighted in the diff-marked PDF files for each part of the specification [3].

This is an open invitation to comment. OASIS solicits feedback from potential users, developers and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

- OData Atom Format Version 4.0:

<http://docs.oasis-open.org/odata/odata-atom-format/v4.0/csprd02/odata-at...> [23]

- OData JSON Format Version 4.0:

<http://docs.oasis-open.org/odata/odata-json-format/v4.0/csprd02/odata-js...> [24]

Additional information about the specifications and the OASIS Open Data Protocol (OData) TC can be found at the TC's public home page:

<https://www.oasis-open.org/committees/odata/> [25]

Comments may be submitted to the TC by any person through the use of the OASIS TC Comment Facility by following the instructions located via the button labeled "Send A Comment" at the top of the TC public home which can also be found at:

https://www.oasis-open.org/committees/comments/index.php?wg_abbrev=odata [26]

Comments submitted by TC non-members for this work and for other work of this TC are publicly archived and can be viewed at:

<https://lists.oasis-open.org/archives/odata-comment/> [27]

All comments submitted to OASIS are subject to the OASIS Feedback License, which ensures that the feedback you provide carries the same obligations at least as the obligations of the TC members. In connection with this public review of "OData, OData Atom Format and OData JSON Format, Versions 4.0", we call your attention to the OASIS IPR Policy [4] applicable especially [5] to the work of this technical committee. All members of the TC should be familiar with this document, which may create obligations regarding the disclosure and availability of a member's patent, copyright, trademark and license rights that read on an approved OASIS specification.

OASIS invites any persons who know of any such claims to disclose these if they may be essential to the implementation of the above specification, so that notice of them may be posted to the notice page for this TC's work.
