

15-day Public Review for SAML 2.0 Session Token Profile Version 1.0

Submitted by cesign on Mon, 2011-10-03 03:36

Type:

15-day Public Review

The OASIS Security Services TC [1] members have produced an updated Committee Specification Draft (CSD) and submitted this specification for 15-day public review:

SAML 2.0 Session Token Profile Version 1.0

Committee Specification Draft 03 / Public Review Draft 03

11 August 2011

Specification Overview:

Web Servers and Application Servers generally maintain security state information for currently active users, particularly once some type of authentication has occurred. This specification defines a format for communicating such security session state based on the OASIS SAML Assertion. It also specifies two different mechanisms for communicating this information between servers via a standard Web browser.

Public Review Period:

The public review starts Monday, 3 October 2011 and ends 18 October 2011. The specification was previously submitted for a 15-day public review on 11 July 2011 [2]. This 15-day review is limited in scope to changes made from the previous review.

Changes are highlighted in the diff-marked PDF file included in the package.

This is an open invitation to comment. OASIS solicits feedback from potential users, developers and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

URIs:

The complete package of the prose specification document and related files are available in the ZIP distribution file at:

<http://www.oasis-open.org/committees/download.php/43741/saml-session-tok...> [1]

Additional information about the specification and the OASIS Security Services TC may be found at the TC's public home page located at:

<http://www.oasis-open.org/committees/security/> [2]

Comments may be submitted to the TC by any person through the use of the OASIS TC Comment Facility which can be accessed via the button labeled "Send A Comment" at the top of the TC public home page, or directly at:

http://www.oasis-open.org/committees/comments/form.php?wg_abbrev=security [3]

Feedback submitted by TC non-members for this work and for other work of this TC is publicly archived and can be viewed at:

<http://lists.oasis-open.org/archives/security-comment/> [4]

All comments submitted to OASIS are subject to the OASIS Feedback License, which ensures that the feedback you provide carries the same obligations at least as the obligations of the TC members. In connection with this public review of SAML 2.0 Session Token Profile Version 1.0, we call your attention to the OASIS IPR Policy [3] applicable especially [4] to the work of this technical committee. All members of the TC should be familiar with this document, which may create obligations regarding the disclosure and availability of a member's patent, copyright, trademark and license rights that read on an approved OASIS specification. OASIS invites any persons who know of any such claims to disclose these if they may be essential to the implementation of the above specification, so that notice of them may be posted to the notice page for this TC's work.
