Akoma Ntoso Version 1.0

Committee Specification Draft 01 / Public Review Draft 01

14 January 2015

Akoma Ntoso Naming Convention Version 1.0

Committee Specification Draft 01 / Public Review Draft 01

14 January 2015

Akoma Ntoso Media Type Version 1.0

Committee Specification Draft 01 / Public Review Draft 01

25 March 2015

**Overview:**

Akoma Ntoso Version 1.0 provides a common legal document standard for specifying parliamentary, legislative, and judicial documents, for interchanging them between institutions anywhere in the world, and for creating a common data and metadata model that allows experience, expertise, and tools to be shared and extended by all participants.

Part 1: XML Vocabulary presents the main motivations, design principles, and benefits of the Akoma Ntoso vocabulary and approach. The document is non-normative material that presents the main pillars of Akoma Ntoso to the stakeholders that need to take decisions about how to manage legal sources in a digital manner in a Semantic Web society.

Part 2: Specifications documents the Akoma Ntoso XSD and DTD standard, including the graphic representation using Oxygen library.

Akoma Ntoso Naming Convention Version 1.0 provides the naming convention for defining IRIs and ids related to the Akoma Ntoso XML standard. Within the schema of Akoma Ntoso, id attributes are declared as optional, but whenever attributes eId and wId are actually used the specifications in this document are mandatory.

Akoma Ntoso Media Type Version 1.0 contains the relevant information for the registration of the Akoma Ntoso media type (akn+xml) with IANA.
