

30-day Public Review for SAML V2.0 Asynchronous Single Logout Profile Extension V1.0

Submitted by censign on Fri, 2012-09-28 15:56

Type:

Public Review

The OASIS Security Services (SAML) TC [1] members have recently approved a Committee Specification Draft (CSD) and submitted this specification for 30-day public review:

SAML V2.0 Asynchronous Single Logout Profile Extension Version 1.0
Committee Specification Draft 01 / Public Review Draft 01
18 September 2012

Specification Overview:

This document defines an extension to the SAML 2.0 Single Logout Protocol that allows the initiator to indicate that it does not expect to receive a response from the session authority. This improves user interface interoperability in deployments that want the identity provider to control the user experience during logout.

TC Description:

The Security Services TC continues to develop value-added specifications and profiles on top of the SAML 2.0 standard, and has recently begun the process to refresh the standard to address errata and other improvements requested by the SAML community.

Public Review Period:

The public review starts today, 28 September 2012 and ends 28 October 2012.

This is an open invitation to comment. OASIS solicits feedback from potential users, developers and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

URIs:

The complete package of the prose specification document and related files are available in the ZIP distribution file at:

<https://www.oasis-open.org/committees/download.php/47023/saml-async-slo-...> [1]

Additional information about the specification and the OASIS Security Services (SAML) TC may be found at the TC's public home page:

<http://www.oasis-open.org/committees/security/> [2]

Comments may be submitted to the TC by any person through the use of the OASIS TC Comment Facility which can be located via the button labeled "Send A Comment" at the top of the TC public home, or directly at:

http://www.oasis-open.org/committees/comments/index.php?wg_abbrev=security [3]

Comments submitted by TC non-members for this work and for other work of this TC are publicly archived and can be viewed at:

All comments submitted to OASIS are subject to the OASIS Feedback License, which ensures that the feedback you provide carries the same obligations at least as the obligations of the TC members. In connection with this public review of SAML V2.0 Asynchronous Single Logout Profile Extension Version 1.0, we call your attention to the OASIS IPR Policy [2] applicable especially [3] to the work of this technical committee. All members of the TC should be familiar with this document, which may create obligations regarding the disclosure and availability of a member's patent, copyright, trademark and license rights that read on an approved OASIS specification. OASIS invites any persons who know of any such claims to disclose these if they may be essential to the implementation of the above specification, so that notice of them may be posted to the notice page for this TC's work.
