

Business Document Naming and Design Rules Version 1.0 OASIS Standard is published

Submitted by censign on Tue, 2017-01-31 22:04

Type:

TC Administration announcements

OASIS is pleased to announce the publication of its newest OASIS Standard, approved by the members on 18 January 2017:

Business Document Naming and Design Rules Version 1.0
OASIS Standard
18 January 2017

Overview:

This specification prescribes a set of naming and design rules used to create XML document model validation artefacts (W3C Schema XSD files and OASIS Context/value association files) associated with abstract information bundles formally described using the Core Component Technical Specification 2.01 [CCTS].

URIs:

The prose specifications and related files are available here:

Business Document Naming and Design Rules Version 1.0 OASIS Standard

Editable source (Authoritative):
