Type:

TC Administration announcements

OASIS is pleased to announce that Emergency Data Exchange Language (EDXL) Hospital AVailability Exchange (HAVE) Version 2.0 from the OASIS Emergency Management TC [1] has been approved as an OASIS Committee Specification.

EDXL-HAVE (HAVE) is an XML messaging standard primarily for exchange of information related to health facilities in the context of emergency management. HAVE supports sharing information about facility services, bed counts, operations, capacities, and resource needs so first responders, emergency managers, coordinating organizations, hospitals, care facilities, and the health community can provide each other with a coherent view of the health system.

This Committee Specification is an OASIS deliverable, completed and approved by the TC and fully ready for testing and implementation.

This Committee Specification 02 differs from Committee Specification 01 only in removing the word "Proposed" from the "HL7® Informative Document" subtitle, along with related cataloging metadata and URI adjustments.

The prose specifications and related files are available here:

Members of the Emergency Management TC [1] approved this specification by Special Majority Vote. The specification had been released for public review as required by the TC Process [2]. The vote to approve as a Committee Specification passed [3], and the document is now available online in the OASIS Library as referenced above.

Our congratulations to the TC on achieving this milestone and our thanks to the reviewers who provided feedback on the specification drafts to help improve the quality of the work.
