TC Administration announcements

OASIS is pleased to announce the publication of a new Approved Errata by the members of the OASIS eXtensible Access Control Markup Language (XACML) TC:

eXtensible Access Control Markup Language (XACML) Version 3.0 Errata 01

Approved Errata

12 July 2017

and

eXtensible Access Control Markup Language (XACML) Version 3.0 Plus Errata 01

OASIS Standard incorporating Approved Errata

12 July 2017

EXtensible Access Control Markup Language (XACML) provides a common language for expressing security policy, such as:

- a method for combining individual rules and policies into a single policy set that applies to a particular decision request;
- a method for basing an authorization decision on attributes of the subject; or
- an abstraction-layer to insulate the policy-writer from the details of the application environment.

These documents list Errata for the OASIS Standard eXtensible Access Control Markup Language (XACML) Version 3.0 and provide a copy of the standard with the errata incorporated.

The prose specifications and related files are available here:

- eXtensible Access Control Markup Language (XACML) Version 3.0 Errata 01

Distribution ZIP file

For your convenience, OASIS provides a complete package of the prose specification and related files in a ZIP distribution file. You can download the ZIP file here:

<http://docs.oasis-open.org/xacml/3.0/errata01/os/xacml-3.0-core-spec-err...> [8]

Members of the XACML TC [1] approved this specification by Special Majority Vote. The specification had been released for public review as required by the TC Process [2]. The vote to approve as a Committee Specification passed [3], and the document is now available online in the OASIS Library as referenced above.

Our congratulations to the TC on achieving this milestone and our thanks to the reviewers who provided feedback on the specification drafts to help improve the quality of the work.
