Invitation to comment on 2 #SAML Candidate OASIS Standards - ends October 5th

Submitted by censign on Tue, 2019-08-06 20:15

Type:

Public Review

OASIS and the Security Services (SAML) TC [1] are pleased to present SAML V2.0 Metadata Interoperability Profile v1.0 and SAML V2.0 Metadata Extensions for Login and Discovery User Interface v1.0 as Candidate OASIS Standards. The COSs are now available for public review and comment.

SAML is an open standard for exchanging authentication and authorization data between parties, in particular, between an identity provider and a service provider.

The Metadata Interoperability Profile v1.0 describes a set of rules for SAML metadata producers and consumers to follow such that federated relationships can be interoperably provisioned, and controlled at runtime in a secure, understandable, and self-contained fashion.

The Metadata Extensions for Login and Discovery User Interface v1.0 define a set of extensions to SAML metadata that provide information necessary for user agents to present effective user interfaces and, in the case of identity provider discovery, recommend appropriate choices to the user.

The TC has received 3 Statements of Use from the Shibboleth Consortium, Internet2, and SUNET [3].

The candidate specifications and related files are available here:

Public Review Period:

The 60-day public review starts 07 August 2019 00:00 UTC and ends 05 October 2019 at 23:59 UTC.

This is an open invitation to comment. OASIS solicits feedback from potential users, developers and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

Comments may be submitted to the TC by any person through the use of the OASIS TC Comment Facility as explained in the instructions located via the button labeled "Send A Comment" at the top of the TC public home page, or directly at:

https://www.oasis-open.org/committees/comments/index.php?wg_abbrev=security [10]

Comments submitted by TC non-members for this work and for other work of this TC are publicly archived and can be viewed at:

<http://lists.oasis-open.org/archives/security-services-comment/> [11]

All comments submitted to OASIS are subject to the OASIS Feedback License, which ensures that the feedback you provide carries the same obligations at least as the obligations of the TC members. In connection with these public reviews of "SAML V2.0 Metadata Interoperability Profile" and "SAML V2.0 Metadata Extensions for Login and Discovery User Interface," we call your attention to the OASIS IPR Policy [4] applicable especially [5] to the work of this technical committee. All members of the TC should be familiar with this document, which may create obligations regarding the disclosure and availability of a member's patent, copyright, trademark and license rights that read on an approved OASIS specification.

OASIS invites any persons who know of any such claims to disclose these if they may be essential to the implementation of the above specification, so that notice of them may be posted to the notice page for this TC's work.
