Type:

Public Review

OASIS and the OASIS OSLC Lifecycle Integration Domains TC are pleased to announce that OSLC Architecture Management Version 2.1 is now available for public review and comment.

For anyone developing complex systems and software, managing change and configurations throughout the development lifecycle can be difficult. This is especially true in heterogeneous environments that include homegrown tools, open source projects, and commercial tools from different vendors. Organizations that need to design, develop, deliver, and evolve a portfolio of products can benefit from an open technical architecture that is minimalist, loosely coupled, and standardized.

The OSLC (Open Services for Lifecycle Collaboration) initiative applies Linked Data principles, such as those defined in the W3C Linked Data Platform (LDP), to create a cohesive set of specifications that can enable products, services, and other distributed network resources to interoperate successfully.

The Architecture Management specification defines the OSLC Architecture Management domain, a RESTful web services interface for the management of architectural resources and relationships between those and related resources such as product change requests, activities, tasks, requirements or test cases. To support these scenarios, this specification defines a set of HTTP-based RESTful interfaces in terms of HTTP methods: GET, POST, PUT and DELETE, as well as HTTP response codes, content type handling and resource formats.

The documents and related files are available here:

OSLC Architecture Management Version 2.1
Committee Specification Draft 01 / Public Review Draft 01
16 August 2018

- Part 1: Specification

How to Provide Feedback

OASIS and the OSLC Domains TC value your feedback. We solicit input from developers, users and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

The public review starts 22 August 2018 at 00:00 UTC and ends 20 September 2018 at 23:59 UTC.

Comments may be submitted to the TC by any person through the use of the OASIS TC Comment Facility which can be used by following the instructions on the TC's "Send A Comment" page (https://www.oasis-open.org/committees/comments/index.php?wg_abbrev=oslc-... [6]).

Comments submitted by TC non-members for this work and for other work of this TC are publicly archived and can be viewed at:

<https://lists.oasis-open.org/archives/oslc-domains-comment/> [7]

All comments submitted to OASIS are subject to the OASIS Feedback License, which ensures that the feedback you provide carries the same obligations at least as the obligations of the TC members. In connection with this public review, we call your attention to the OASIS IPR Policy [1] applicable especially [2] to the work of this technical committee. All members of the TC should be familiar with this document, which may create obligations regarding the disclosure and availability of a member's patent, copyright, trademark and license rights that read on an approved OASIS specification.

OASIS invites any persons who know of any such claims to disclose these if they may be essential to the implementation of the above specification, so that notice of them may be posted to the notice page for this TC's work.

Additional information about the specification and the OSLC Domains TC can be found at the TC's public home page:
