**Type:**

TC Administration announcements

OASIS is pleased to announce the approval and publication of an Approved Errata by the members of the OASIS Message Queuing Telemetry Transport TC:

MQTT Version 3.1.1 Errata 01

OASIS Approved Errata

10 December 2015

and

MQTT Version 3.1.1 Plus Errata 01

OASIS Standard Incorporating Approved Errata 01

10 December 2015

**Overview:**

The MQTT TC is developing a lightweight, client-server publish/subscribe messaging transport protocol. It is open, simple, and designed so as to be easy to implement. These characteristics make it ideal for use in many situations, including constrained environments such as for communication in Machine to Machine (M2M) and Internet of Things (IoT) contexts where a small code footprint is required and/or network bandwidth is at a premium.

These documents list and incorporate errata for MQTT Version 3.1.1 OASIS Standard

**URIs:**

The prose specifications and related files are available here:

- MQTT Version 3.1.1 Errata 01

Distribution ZIP file

For your convenience, OASIS provides a complete package of the prose specification and related files in a ZIP distribution file. You can download the ZIP file here:

<http://docs.oasis-open.org/mqtt/mqtt/v3.1.1/errata01/os/mqtt-v3.1.1-errata01-os.zip> [7]

Members of the OASIS Message Queuing Telemetry Transport TC [1] approved this errata by Special Majority Vote. The errata had been released for public review as required by the TC Process [2]. The vote to approve as an Approved Errata passed [3], and the document is now available online in the OASIS Library as referenced above.

Our congratulations to the TC on achieving this milestone and our thanks to the reviewers who provided feedback on the specification drafts to help improve the quality of the work.
