## Specification Summary

Open Document Format for Office Applications (OpenDocument) Version 1.2 specifies the characteristics of an XML-based application-independent and platform-independent digital document file format, as well as the characteristics of software applications which read, write and process such documents. This standard is applicable to document authoring, editing, viewing, exchange and archiving, including text documents, spreadsheets, presentation graphics, drawings, charts and similar documents commonly used by personal productivity software applications. The OASIS membership approved the OASIS Standard on 29 September 2011.

For more information on OpenDocument and the Open Document Format for Office Applications (OpenDocument) Technical Committee, see the TC's home page at <http://www.oasis-open.org/committees/office> [18].
