

# **(PR) 15-day Public Review for Integrated Collaboration Object Model (ICOM) for Interoperable Collaboration Services Version 1.0**

Submitted by censign on Sun, 2011-11-20 14:32

**Type:**

15-day Public Review

The OASIS Integrated Collaboration Object Model for Interoperable Collaboration Services (ICOM) TC [1] members have produced an updated Committee Specification Draft (CSD) and submitted this specification for 15-day public review:

Integrated Collaboration Object Model (ICOM) for Interoperable Collaboration Services Version 1.0  
Committee Specification Draft 02 / Public Review Draft 02  
16 November 2011

**Specification Overview:**

The Integrated Collaboration Object Model (ICOM) for Interoperable Collaboration Services standard defines a framework for integrating a broad range of domain models for collaboration activities in an integrated and interoperable collaboration environment. The framework is intended to enable seamless transitions across collaboration activities. For example, applications can aggregate conversation threads in email with other conversations on the same topic in instant message, over the phone or via real-time conferencing, by discussion threads in community forum, weblog or micro blog, and activity stream of participants from all channels. ICOM encompasses and improves on a range of models which are part of existing standards and technologies. The framework lowers the barrier for independent software vendors and open source communities to integrate collaboration services and to create collaboration tools that offer seamless user experience for diverse collaboration activities with minimal context switching.

**TC Description:**

The OASIS ICOM TC works to define a standard for integrated and interoperable enterprise collaboration.

**Public Review Period:**

The public review starts 21 November 2011 and ends 06 December 2011. The specification was previously submitted for a 30-day public review [1]. This 15-day review is limited in scope to changes made from the previous review. Changes are highlighted in the diff-marked PDF file included in the specification ZIP file package.

This is an open invitation to comment. OASIS solicits feedback from potential users, developers and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

**URIs:**

The complete package of the prose specification document and related files are available in the ZIP distribution file at:

Comments may be submitted to the TC by any person through the use of the OASIS TC Comment Facility which can be located via the button labeled "Send A Comment" at the top of the TC public home, or directly at:

[http://www.oasis-open.org/committees/comments/form.php?wg\\_abbrev=icom](http://www.oasis-open.org/committees/comments/form.php?wg_abbrev=icom) [3]

Comments submitted by TC non-members for this work and for other work of this TC are publicly archived and can be viewed at:

<http://lists.oasis-open.org/archives/icom-comment/> [4]

All comments submitted to OASIS are subject to the OASIS Feedback License, which ensures that the feedback you provide carries the same obligations at least as the obligations of the TC members. In connection with this public review of Integrated Collaboration Object Model (ICOM) for Interoperable Collaboration Services Version 1.0, we call your attention to the OASIS IPR Policy [3] applicable especially [4] to the work of this technical committee. All members of the TC should be familiar with this document, which may create obligations regarding the disclosure and availability of a member's patent, copyright, trademark and license rights that read on an approved OASIS specification. OASIS invites any persons who know of any such claims to disclose these if they may be essential to the implementation of the above specification, so that notice of them may be posted to the notice page for this TC's work.
