Public Review

The OASIS Universal Business Language (UBL) TC [1] members have recently approved a Committee Specification Draft (CSD) and submitted it for 30-day public review:

Business Document Naming and Design Rules Version 1.0  
Committee Specification Draft 01 / Public Review Draft 01  
16 March 2016

**Overview:**

This specification prescribes a set of naming and design rules used to create XML document model validation artefacts (W3C Schema XSD files and OASIS Context/value association files) associated with abstract information bundles formally described using the Core Component Technical Specification 2.01 [CCTS].

NOTE: For the convenience of readers familiar with the previously-published "UBL Naming and Design Rules Version 3.0" Committee Specification Public Review Draft 02, please note that the normative, technical content of this new work product was derived from and is identical to that publication.

Non-normative content from that spec has been incorporated into a new Committee Note Draft whose public review will be announced separately.

**Public Review Period:**

The public review starts 05 April 2016 at 00:00 UTC and ends 04 May 2016 at 23:59 UTC.

This is an open invitation to comment. OASIS solicits feedback from potential users, developers and others, whether OASIS members or not, for the sake of improving the interoperability and quality of its technical work.

Reviewers may provide comments directly from the comment-tag version of document. The file
