U.S. TAG to ISO/PC 317 - Consumer protection: privacy by design for consumer goods and services

The International Standards Organization (ISO) Project Committee 317 [1] is developing a global consumer privacy standard that can be embedded into the design of products and services. The US Technical Advisory Group (TAG) represents American interests in ISO/PC 317. The TAG is comprised of privacy experts from premiere U.S.-based organizations committed to consumer privacy.

Current Members
US TAG membership

Funding for the US TAG is provided by members in the group. TAG members receive:

- **Global recognition** among regulators and consumers as proactive players in the consumer privacy space
- **Official voice** in the global debate on privacy
- **Ability to ensure the US position on privacy issues is represented** in the ISO standard and in any compliance requirements that result from the work. (Without the TAG, the US would be limited to Observer status in ISO/PC 317)
- **Ability to ensure their organization’s position on privacy issues is represented** in ISO/PC 317
- **Promotional benefits**: press releases, webinars, and focused events

TAG membership is open to all organizations doing business in the US. For more information, contact: communications@oasis-open.org.

Other Privacy work in OASIS

The OASIS technical community has a **longstanding commitment to consumer privacy**. Key projects include:

**OASIS Cross-Enterprise Security and Privacy Authorization (XSPA) TC**

Enabling the interoperable exchange of healthcare privacy policies, consent directives, and authorizations.

See: XSPA video [36] (15 min.) presented by Duane DeCouteau.

**OASIS Privacy by Design Documentation for Software Engineers (PbD-SE) TC**

Enabling privacy to be embedded into IT system design and architecture.

See Privacy by Design slide deck [38] by Dr. Ann Cavoukian.

**OASIS Privacy Management Reference Model (PMRM) TC**
Providing a guideline for developing operational solutions to privacy issues.

See PMRM slide show [40] on PMRM John Sabo and Gerson Janssen.

For information on joining any of these projects, contact communications@oasis-open.org [41].
